

Swiss Programme for Erasmus+
Grants Call 2024

Vocational education and training: International mobility projects

All countries worldwide are [eligible programme countries](#) for international mobility.

Mobilities are granted according to concrete activities and subsidised according to predefined flat rates for subsistence, travel, organisation, etc. (see grant table).

- **Travel costs:** Flat-rate travel allowances help cover the costs of the return journey from the place of residence to the location where the activity takes place. As a rule, public transportation should be used. The programme countries are grouped into four geographical regions. Here, the allowances are based on the distance from the country of origin to the destination country.
- **Subsistence costs:** These allowances are designed to cover accommodation and meals and other personal expenses of the participants. The flat-rate allowances for subsistence are based on the cost of living in the destination country and are divided into three country categories. For European Overseas Countries and Territories (OCTs), the lump sum of the respective EU Member State to which a Country or Territory belongs, i.e. Denmark (Greenland), France (e.g. Reunion), the Netherlands (e.g. Aruba) or the United Kingdom (e.g. Falkland Islands), is allocated.
- **Special needs costs:** The costs associated with the participation of people with disabilities may be claimed, e.g. special transportation for wheelchair-users. The estimated amount should be requested in the application and the final expense claim should be based on actual costs as per supporting documents.
- **Linguistic support costs:** Where there is a justified need, a flat-rate allowance to improve language skills (for selected languages) before or during the stay can be applied for (only on presentation of proof).
- **Organisation costs:** The flat-rate for organisational support is a contribution to the applicant institution to cover project costs such as material, dissemination and information events.
