

Additional financial and contractual regulations for ongoing cooperation projects.

Last update: 06 May 2021

These provisions only apply where your project plans to carry out virtual activities instead of physical activities due to the COVID 19 situation.

The provisions provide for the following arrangements for Strategic Partnerships:

- Transnational project meetings, learning, teaching and training activities and multiplier events can take place virtually.
- No flat rates are reimbursed for virtual transnational project meetings; the costs are to be covered by the project management flat rate.
- For virtual multiplier events, 15% of the original flat rate for physical events per participant can be reimbursed, up to a maximum of CHF 2,000.
- For virtual learning, teaching and training activities, 15% of the flat rate for individual support can be reimbursed; reimbursement of the flat rate for travel expenses is not foreseen. The maximum duration of online and physical combined activities must be respected.
- Budget reallocations with an amendment between the cost categories **intellectual output, transnational project meetings, multiplier events, learning, teaching and training activities are possible up to 60%**. The cost category project management is excluded from this.

The COVID 19 provisions of March 2020 still apply:

- In accordance with the project extensions granted by the European National Agency of the coordinating project partner, Movetia grants the project extension to the Swiss institution involved in the project.
- For all mobility interruptions or cancellations due to the COVID-19 pandemic, the principle of "force majeure" applies. Movetia may cover the costs of cancellations if appropriate supporting documents are provided. The contractual requirement remains that no additional costs can be covered by Movetia once the maximum funding amount per project has been reached.
