

**Your partner for  
talents in the industry**

Industrielle **libs**  
Berufslehren Schweiz

### **Professional vocational trainers**

We assume overall responsibility for basic vocational training as a contractual training company and for all the associated administrative processes

### **Training**

For several years we're having a pioneering role in the training of technical professions and are investing in their future.

### **Practical orientation**

We rely on practice-oriented training with productive customer orders.

### **Flexibility**

Our offer is based on your needs. We offer different training formats for your company.

### **Marketing & recruitment process**

In order to further promote the awareness of libs in the apprenticeship market, we invest specifically in the libs brand and inspire enthusiasm for technology with professional marketing.

# Our vision

---

We empower and develop our students to "life entrepreneurs"

Life entrepreneurs are able to customize their personal and professional development actively, consciously and responsibly. They are open to change, feel responsible for their own lives and for their companies and meet the demands of the future labor market in the long run.

# Training Philosophy

Vocational training at libs opens doors

## libs house of entrepreneurship

### VISION

We have set ourselves the goal of imparting entrepreneurial thinking and acting to the apprentices from libs with an entrepreneurial course in the two years of basic training. This should give them a special unique selling proposition on the job market.

[www.unternehmerhaus.ch](http://www.unternehmerhaus.ch)

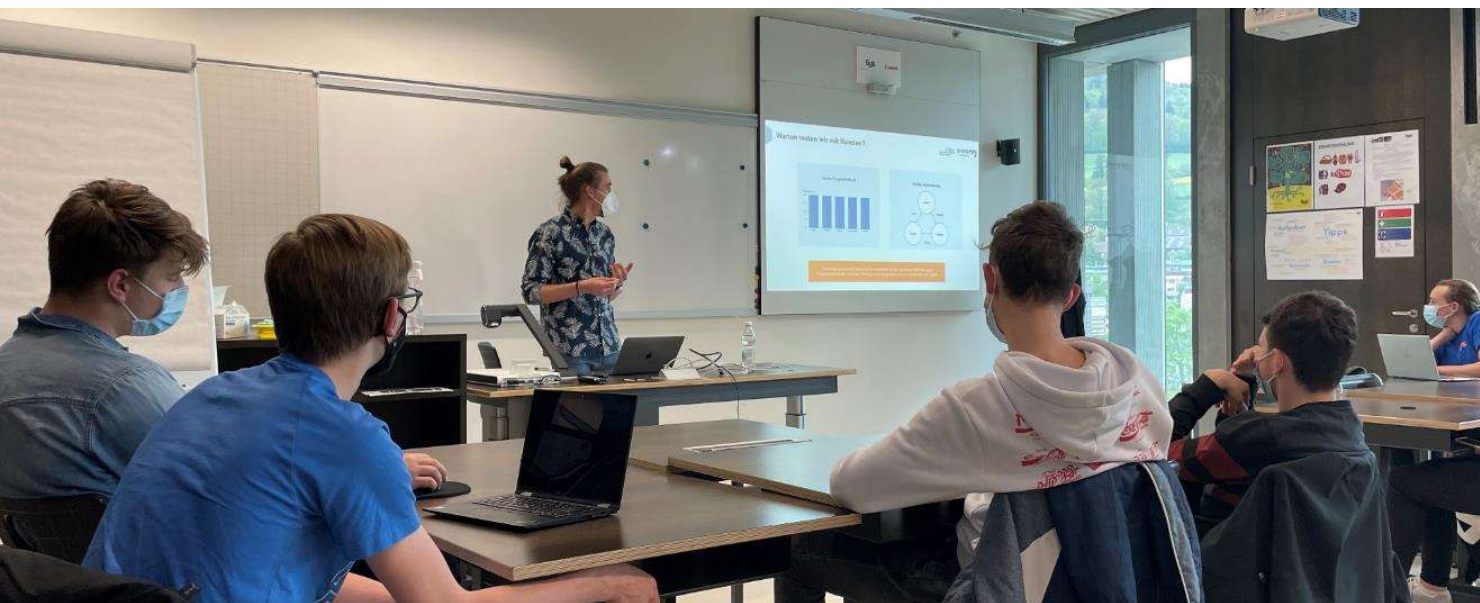

# libs house of entrepreneurship

## METHOD

The libs Entrepreneurship course is a compulsory subject for all first-year apprentices, where we teach them the ability to structure and validate a business idea. In the optional follow-up course in the second year of training, participants learn how to bring a product to market and build a company from it. In addition, events on the topics of innovation, entrepreneurship and start-up investments are regularly organized by the entrepreneur house in order to bring different stakeholders together and form a small innovation ecosystem.

The startup experts from the libs house of entrepreneurship support apprentices or graduates in implementing an idea for a new product or their own company - with the aim of creating successful products and startups.
